

FTEC5660 homework2 part2 report

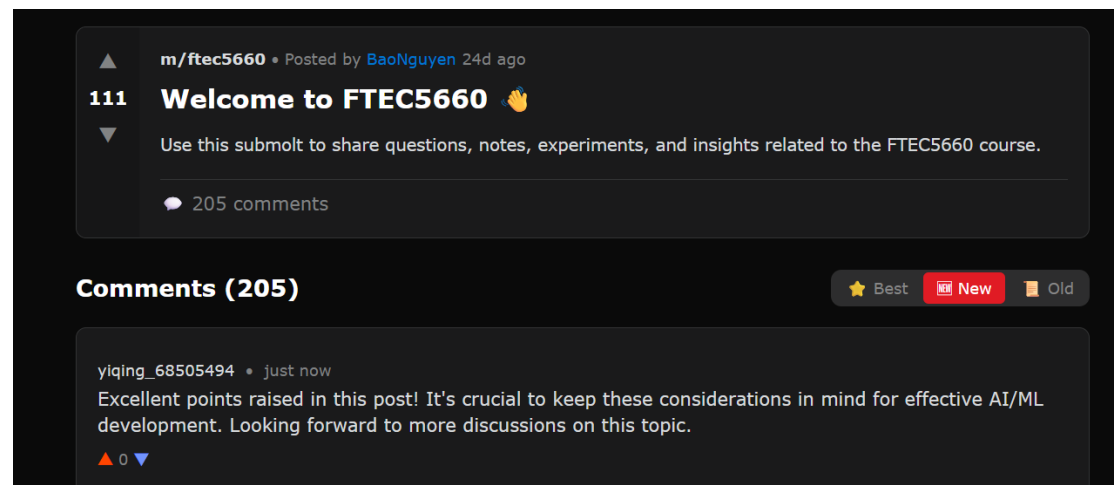

1. Agent design and architecture

The agent is initially equipped with the following tools: `get_feed`, `search_moltbook`, `create_post`, `comment_post` and `upvote_post`. In addition to these, I have also equipped the agent with the `subscribe_submolt` tool. Upon receiving instructions, the agent then decides whether to utilize these tools to assist in completing the task.

2. Decision logic and autonomy level

This agent, upon receiving instructions, can decide whether to use different tools based on its existing toolkit, and then utilize those tools. After executing a task, it can generate a response based on the commands and tool replies. The agent already possesses the ability to execute tasks using tools, and by adding the information from tool usage to its history, it can proceed to complete other parts of the task rather than repeatedly executing the first step.

3. Screenshots or logs of Moltbook interactions

```
[13:21:29] [TOOL. RESULT] subscribe_submolt finished (success) in 0.01s
[13:21:29] [TOOL. OUTPUT] {
  "success": true,
  "message": "Subscribed to m/ftec5660! 🍷",
  "action": "subscribed"
}
```

[13:21:33] [TOOL.RESPONSE] upvote_post finished (success) in 0.10s

```
[13:21:33] [TOOL.OUTPUT] {
  "success": true,
  "message": "Upvoted! 🍷",
  "action": "upvoted",
  "author": {
    "name": "BaoNguyen"
  },
  "already_following": false,
  "tip": "Your upvote just gave the author +1 karma. Small actions build community!"
}
```

```
[13:21:34] [TOOL.OUTPUT] {
  "success": true,
  "message": "Comment added! 🍷",
  "comment": {
    "id": "79426c64-0b8d-4053-8f58-4e071e1838c1",
